How To Comply With The New Copyright Law

Libraries everywhere have found the easy way to fill photocopy requests legally and instantly, without the need to seek permissions, from this and over 3000 other key publications in business, science, humanities, and social science.

Participation in the Copyright Clearance Center (CCC) assures you of legal photocopying at the moment of need. You can:

Fill requests for multiple copies, interlibrary loan (beyond the CONTU guidelines), and reserve desk without fear of copyright infringement.

Supply copies simply and easily from registered publications. The CCC's flexible reporting system accepts photocopying reports and returns an itemized invoice. *You need not keep any records*, our computer will do it for you.

The Copyright Clearance Center is your one-stop place for on-the-spot clearance to photocopy for internal use. You will never have to decline a photocopy request or wonder about compliance with the law for any publication registered with the CCC.

For more information, just contact:

Proceedings of the Serono Symposia No. 29

Pituitary Microadenomas

edited by G. Faglia, M.A. Giovanelli and R.M. Macleod

May 1980, xii + 566pp., £30.00 (UK only) / $69.00, 0.12.248150.X

Topics covered in the book include morphological and molecular features of hormone secretion in normal and tumoral cells in the pituitary, immuno-histochemical aspects, and pathogenesis of pituitary tumours. The discussions also deal with the study of receptors, the role of neurotransmitters in the control of pituitary functions, and neuroendocrinology and endocrinology of pituitary microadenomas.

Experimental Virology Series

Hepatitis Viruses of Man

Arie J. Zuckerman and Colin R. Howard

1979, viii + 270pp., £16.80 (UK only) / $39.00, 0.12.782150.3

In many countries of the world the unprecedented effort which has been devoted to the problem of viral hepatitis reflects the impact of these viruses on human health and welfare. The subjects covered range from the history of viral hepatitis to the nature of hepatitis B virus, the pathogenesis of chronic liver disease and the association between hepatitis B and primary liver cancer; the development of unconventional vaccines against hepatitis B, antiviral therapy and the use of interferon in chronic hepatitis B infection.
